

THE TERRY FOX
FOUNDATION

We're One Step Closer to a World Without Cancer Thanks to You

Your generosity is making a life-changing difference in the lives of cancer patients and their families across Canada and beyond. Here's an update on our progress and the incredible advances **you make possible** by giving to The Terry Fox Foundation.

Terry Fox Runs are 100% volunteer-led, so your donations go even further.

That means more funding from donors can go where it's meant to: supporting the very best cancer research in Canada.

\$20.7 MILLION

Generously contributed by our supporters in 2020/21

\$15.8 MILLION

Distributed to The Terry Fox Research Institute and other cancer centres in 2020/21

385 RESEARCHERS

Granted funds for projects at 94 institutions last year

You're supporting the top 5% of cancer researchers in Canada and their science.

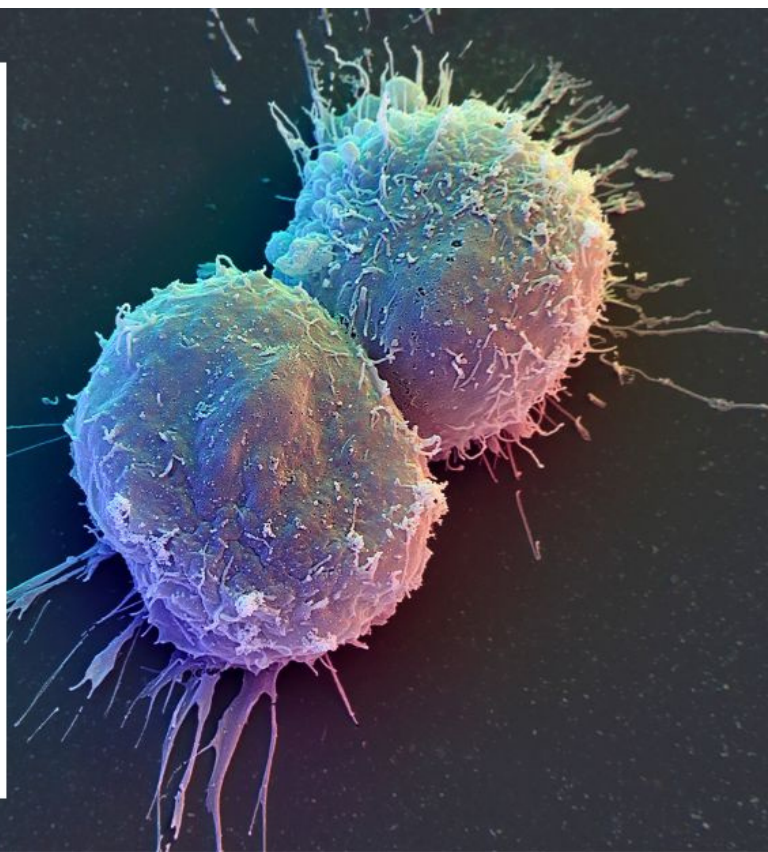

By funding the most promising projects of the brightest minds in cancer research today, your generosity goes that much further for patients.

**NEW RESEARCH TO TARGET THE
CELLULAR 'ROOTS' OF CANCER**

With continued funding from The Terry Fox Foundation, Dr. John Dick is expanding on his pioneering work in blood stem cells to **uncover the root drivers of tumor growth and relapse** in other high-risk cancers.

1994
Landmark discovery of cancer stem cells
in Dr. Dick's lab.

You're making a difference in the lives of cancer patients with urgent, unmet need.

Did you know that Canada's four deadliest types of cancer receive **less than 2%** of charity funding? That's why we invest where it's needed most.

**A MADE-IN-CANADA MODEL
FOR DETECTING LUNG CANCER**

A world-first predictive model will help screen for lung cancer in its early stages, when it has a greater potential to be curable—an innovation that donor support made possible.

77%
**Tumours detected
with this model** were
found in early stages.

Dr. Stephen Lam, Leon Judah Blackmore Chair in Lung Cancer Research, BC Cancer Agency, and Terry Fox Research Institute-funded investigator

But we still have more to accomplish together. Canadians with cancer are depending on us—and on your continued support.
Thank you for bringing hope to those who need it most.
